

FIT106-1

Description:

The FIT106-1 toroidal inductor is specifically designed to minimize transients. It stores energy and therefore, conditions the output signal by leveling the current waveform providing a more stable current supply. Generally used in high frequency circuits, its standard design provides an economical solution in differential mode applications or as an output inductor.

Electrical Specifications (@25C):

Min. Inductance (μ H)		Rated	Max
No Bias	At Bias	DC Amps	DCR (m Ω)
253.0	153.0	4.0	139.0

Note: No Bias inductance measured at .25V, 10KHZ.

Dimensions:

A	B	C	D	E	F	G
1.30	.725	1.40	.500	.724	.125	.026 \pm .003

Units: In inches

Weight: .090 lbs.

Technical Notes:

1. Nominal inductance values are typically 10% higher than minimal rating.
2. Biased inductance measured at rated DC amps.
3. Operation at rated current yields approximately 40°C temperature rise over 20°C ambient.
4. Operating Temperature: -40°C to +85°C

RoHS Compliance: As of manufacturing date February 2016, all standard products meet the requirements of 2015/863/EU, known as the RoHS 3 initiative.
