### UL TEST REPORT AND PROCEDURE

| Certification Type: | Component Recognition |
| CCN: | QQGQ2, QQGQ8 (Power Supplies for Information Technology Equipment Including Electrical Business Equipment) |
| Product: | Power Supply |
| Model: | AWSP150-5, AWSP150-12, AWSP150-24, EIPS150S05, EIPS150S12, EIPS150S24 |
| Rating: | Input: 100-240 Vac 2.7A(max), 50-60Hz |
| | Output:  
AWSP150-5, EIPS150S05: 5Vdc, 30.0A  
AWSP150-12, EIPS150S12: 12Vdc, 12.5A  
AWSP150-24, EIPS150S24: 24Vdc, 6.3A |
| Applicant Name and Address: | AXIS CORP  
38-1 MIN-SHENG N RD, SEC 1  
KUEI SHAN HSIANG  
TAOYUAN HSIEN 333 TAIWAN |

This is to certify that representative samples of the products covered by this Test Report have been investigated in accordance with the above referenced Standards. The products have been found to comply with the requirements covering the category and the products are judged to be eligible for Follow-Up Service under the indicated Test Procedure. The manufacturer is authorized to use the UL Mark on such products which comply with this Test Report and any other applicable requirements of UL LLC ('UL') in accordance with the Follow-Up Service Agreement. Only those products which properly bear the UL Mark are considered as being covered by UL's Follow-Up Service under the indicated Test Procedure.

The applicant is authorized to reproduce the referenced Test Report provided it is reproduced in its entirety.

UL authorizes the applicant to reproduce the latest pages of the referenced Test Report consisting of the first page of the Specific Technical Criteria through to the end of the Conditions of Acceptability.

Any information and documentation involving UL Mark services are provided on behalf of UL LLC (UL) or any authorized licensee of UL.

Supporting Documentation

The following documents located at the beginning of this Procedure supplement the requirements of this Test Report:
A. Authorization - The Authorization page may include additional Factory Identification Code markings.
B. Generic Inspection Instructions -
   i. Part AC details important information which may be applicable to products covered by this Procedure. Products described in this Test Report must comply with any applicable items listed unless otherwise stated in the body of this Test Report.
   ii. Part AE details any requirements which may be applicable to all products covered by this Procedure. Products described in this Test Report must comply with any applicable items listed unless otherwise stated in the body of each Test Report.
   iii. Part AF details the requirements for the UL Certification Mark which is not controlled by the technical standard used to investigate these products. Products are permitted to bear only the Certification Mark(s) corresponding to the countries for which it is certified, as indicated in each Test Report.

Product Description

The unit is a switching power supply evaluated for building in.

Model Differences

All models are identical except for model designation, output rated. Models EIPS series are identical to Models AWSP series except model designations.

Technical Considerations

- Equipment mobility: for building-in
- Operating condition: continuous
- Mains supply tolerance (%): +10%, -10%
- Tested for IT power systems: No
- IT testing, phase-phase voltage (V): N/A
- Class of equipment: Class I (earthed)
- Mass of equipment (kg): < 18
- Protection against ingress of water: IP X0
- The product was submitted and evaluated for use at the maximum ambient temperature (Tma) permitted by the manufacturer’s specification of: 40°C
- The product is intended for use on the following power systems: TN
The following were investigated as part of the protective earthing/bonding: metal enclosure

### Engineering Conditions of Acceptability

For use only in or with complete equipment where the acceptability of the combination is determined by UL LLC. When installed in an end-product, consideration must be given to the following:

- The end-product Electric Strength Test is to be based upon a maximum working voltage of: Primary-SELV: 428 Vrms, 900 Vpk, Primary-Earthed Dead Metal: 413 Vrms, 860 Vpk

- The following secondary output circuits are SELV: All secondary outputs

- The following secondary output circuits are at non-hazardous energy levels: All secondary outputs are not hazardous energy

- The following output terminals were referenced to earth during performance testing: All outputs

- The power supply terminals and/or connectors are: Suitable for factory wiring only, Not investigated for field wiring

- The maximum investigated branch circuit rating is: 20 A

- The investigated Pollution Degree is: 2

- Proper bonding to the end-product main protective earthing termination is: Required

- An investigation of the protective bonding terminals has: Been conducted

- The following magnetic devices (e.g. transformers or inductor) are provided with an OBJY2 insulation system with the indicated rating greater than Class A (105°C): T1 (Class B)

- The following end-product enclosures are required: Electrical, Fire

- The equipment is suitable for direct connection to: AC mains supply
